Hiring Team  
ACI Worldwide

Dear Hiring Manager,

I am writing to express my interest in the Associate Software Engineer role in Western Cape, South Africa. I hold a BSc in Computer Science and Business Computing degree from the University of Cape Town. I am currently working as a Graduate Software Developer at TFG (The Foschini Group) in Cape Town.

During my time at TFG I've contributed to end-to-end features, bug fixes, and reliability improvements while working closely with senior engineers and cross-functional stakeholders. I have hands-on experience in object-oriented languages (Java, Python and C#) and modern web and cloud technologies (.NET Core, Node/NestJS, React, Docker, CI/CD tools).

I thrive in small, agile teams. I enjoy collaborating to design, develop, test, and deliver software solutions. I pay close attention to how customers use products and bring practical technical judgement to trade-offs and design decisions. I am comfortable working under pressure, organizing multiple priorities, and I have a strong appetite for learning, whether that means deepening my knowledge of Java or picking up new languages and tools quickly.

My biggest strength is the ability to learn and to learn from others. I bring with me accountability, results driven mindset, innovative and collaborative attitude. I hold myself to high standards when delivering commitments, and I aim to solve problems with customer impact in mind.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and enthusiasm for payments technology can contribute to ACI's goals.

Kind Regards,  
Prince Moyo
